ELINCHROM ACCESSORIES

DESCRIPTION & RETAIL PRICE

Standard Reflector & Grid 21cm (8.3") Kit - EL26050

The Standard Reflector 21 cm (8.3") gives a medium spread of hard and contrasty light. It can be used for direct or indirect lighting with Elinchrom Umbrellas.

The included 30-degree grid limits the light spread and provides a soft-edged pool of light on the backgrounds and sharp shadows of the subject.

Additional grids of 20 and 12 degrees are available, and this reflector can be used with the Barndoor Kit to further shape light and add filters.

Grid Kit 21cm (8.3") - EL26011

The Elinchrom Grid Kit 21cm (8.3") includes all available Elinchrom 21cm (8.3") round grids. There is one 30-degree, one 20-degree, and one 12-degree grid. The different angles give you control on how tight the beam of light is. The smaller the angle, the more focused the beam. Our grids are painted in black to prevent light from bouncing off the sides.

This kit also includes the Elinchrom Grid Bag. Elinchrom has designed it to transport and store up to 4 grids and similar accessories, in a safe and convenient way.

ELINCHROM ACCESSORIES

DESCRIPTION & RETAIL PRICE

Barndoor 21cm (8.3") Kit - EL26041

The Elinchrom Barndoor 21cm (8.3") Kit includes a Light Carrier, two rectangular barndoor blades of 20x15cm (7.9x 5.9"), and four trapezium barndoor blades of 20x15cm (7.9x 5.9").

Barndoors are used to shape light and avoid light spill. They do not affect the hardness or softness of the light. The included barndoors are removable, and the six barndoors included in this kit will give you the freedom to adjust the shape of your light.

The light carrier also enables the use of filters to add mood, atmosphere, or dramatic conditions to the scene.

BOX CONFIGURATION
