Information

Modelling Lamp E27 (23002)

Due to tolerances in the production process of this lamp, it may happen that the modelling lamp touches the protection cap (26124).

There is a potential risk that the lamp may break during transportation.

To prevent damages, you can order the last version of the protection cap 27124, which we adapted in size, since the manufacturer of these lamps are not able to match tolerances like they did in the past...!

27124 Protective Cap (Height = 90mm)

Grid Reflector

A similar problem could appear if the Grid Reflector (26144) is used with Grids. The lamp may touch the Grid, or the Grid may not fit by using this lamp.

In case this happens, there is a new version of this Grid Reflector available, which accepts slightly longer modelling lamps

26080 Grid Reflector 18cm 60°
